🎯 Objective

Motivated and detail-oriented software engineer with 5+ years of experience designing and implementing internal tools and enterprise solutions using C#.NET. Proven ability to analyze complex systems, drive product improvements, and bridge the gap between engineering and operations. Seeking to contribute to Your mission of building innovative tools that empower people worldwide.

🌟 Key Qualifications

- **System Analysis & Architecture:** Expertise in translating business requirements into functional design. Adept at writing Use Cases, Flow Diagrams, and Technical Specs.
 - **C#.NET Developer:** Experienced in developing scalable systems using .NET, ASP.NET MVC, WPF, Web API, and LINQ, build the install or deployed on cloud platforms for production-grade reliability and performance.
 - **Full Stack Web Developer:** Skilled in building modern, scalable web applications using Next.js, React, and TypeScript with PostgreSQL backends, deployed on cloud platforms for production-grade reliability and performance.
 - **Database Design:** Strong command of SQL Server and MongoDB, including query optimization and schema design.
 - **Agile Methodologies:** Experienced in Scrum workflows, sprint planning, and iterative development cycles to deliver high-quality software on time.
 - **Technical Documentation:** Proficient in writing and maintaining technical documentation for internal and external users.
 - **IT Support:** Provided technical support and troubleshooting for end-users, ensuring minimal downtime and optimal system performance.
 - **Project Leadership:** Led a 5-member IT support team, aligning development efforts with user needs and support insights.
 - **Cross-functional Collaboration:** Worked directly with Japanese and Thai teams on shared codebases, support tooling, and multi-national deployments.
-

Professional Experience

Runexy Corporation / Runexy (Thailand)

Software Engineer & IT Support Team Lead

2018 – Present / Niigata, Japan / Bangkok, Thailand

- Designed and developed enterprise-grade tools in C#/.NET to support internal operations and customer support processes.
- Joined system design and development for Log Collecting Solution (**MylogStar**) and DLP solution (**RunDX**), including requirements gathering, technical documentation, and architectural design.
- Architected and delivered **MylogStar Desktop** and **RunDX Device Control**, an enterprise-grade diagnostic and device control platform with advanced monitoring, remote policy management, and real-time data collection capabilities using modern WPF front end.
- Developed backend log analysis systems for alert tracing, file export monitoring, and device activity reporting with multi-tenant architecture support.
- Coordinated cross-border feature releases, ensuring alignment between Japan-based product managers and Thailand-based engineering team.

Technologies: .NET 8, .NET Blazor Framework, WPF, SQL Server, Entity Framework, Docker, GitHub, Azure DevOps, Figma, Windows APIs

Video Editor

- Produced, edited, and published engaging video content for YouTube and Twitch, driving audience growth and improving viewer retention.
 - Managed end-to-end video production workflow, including planning, recording, editing, and post-production using industry-standard tools (Adobe Premiere Pro, DaVinci Resolve).
 - Collaborated with streamers and content creators to deliver high-quality multimedia assets tailored to target audiences.
 - Analyzed channel metrics to optimize content strategy and increase engagement across platforms.
 - Maintained consistent brand identity and visual style across all published media.
 - Channels: [YouTube](#) | [Twitch](#)
-

Core Competencies

- System Thinking & Problem Solving
 - Product-driven Mindset
 - API & Data Design
 - Technical Documentation
 - Agile (Scrum) Workflows
 - Bilingual Communication (TH/JP)
-

Technical Stack

Category	Skills
Languages	C#, SQL, TypeScript (basic), JavaScript (basic)
Frameworks	.NET, ASP.NET MVC, WPF, Web API, .NET Blazor
Cloud Platforms Skill	Azure, AWS, Google Cloud
Modern Web Development	Full Stack Next.js, React, TypeScript
Databases	SQL Server, MongoDB, PostgreSQL
Dev Tools	Git, Visual Studio, Docker, Azure DevOps, AWS DevOps
Design & UX	Figma, RESTful API Design
Languages	Thai (native), Japanese (business), English (intermediate)

Education

Bachelor of Engineering in Computer Engineering

Thammasat University, Thailand — *Class of 2018*

Certifications

- **AWS Certified Cloud Practitioner**
- **Google Data Analytics** ([Coursera](#) | [PDF](#))
- **Google Advanced Data Analytics** ([Coursera](#) | [PDF](#))
- **Google Cybersecurity** ([Coursera](#) | [PDF](#))
- **Google Project Management** ([Coursera](#) | [PDF](#))
- **Japanese Language Proficiency Test (JLPT N3)**
